AI Declaration Form

Student name: Adnil Lumaras

Team name: Sponty

Project title: Soonty CSWI

AI use level: Assisted

Section B: Usage log:

Tool and version	Date	Component or file affected	Purpose	Prompt summary	What AI produced	Accepted / modified / rejected	Commit hash
ChatGPT (OpenAI)	14 Oct 2026	src/office.ts Outlook authentication dialog	Troubleshoot Microsoft sign-in within the Outlook add-in.	Asked AI to investigate why Microsoft authentication opened outside the Outlook task pane and left the add-in unauthenticated.	Suggested using the Office dialog flow, waiting for the Outlook host to initialize, and returning authentication tokens securely to the task pane.	Modified	`74d8322c64aa3e3550c57ec09c7e247130559b60`
ChatGPT (OpenAI)	14 Oct 2026	src/office.ts Office dialog validation	Improve authentication security and error handling.	Asked AI to review the Outlook authentication handoff and identify security or reliability issues.	Proposed validating the origin of messages returned by the Office dialog and checking the returned response type before accepting authentication tokens.	Accepted	`259e1d40e3871e9fc079f2c3ecf90147df1fda09`
ChatGPT (OpenAI)	14 Oct 2026	Authentication callback / Outlook sign-in handoff	Improve failed sign-in handling.	Asked AI how the system should handle cases where Microsoft authentication succeeds but Outlook cannot receive the returned session.	Suggested showing an explicit error instead of redirecting away and leaving the Outlook task pane signed out without explanation.	Modified	`cb70c39f5c5f9c11b12477858e337fc08bf49a8a`
ChatGPT (OpenAI)	14 Oct 2026	api/cron/notifications.ts Notification processing	Improve backend notification performance.	Asked AI to review the scheduled notification backend and suggest a safer way to process multiple queued notifications.	Suggested batching recipient lookups and using a limited number of parallel workers instead of performing each notification operation sequentially.	Accepted	`fe72fa655dfe9cdfa177c1151f0fc1702f73207f`

Tool and version	Date	Component or file affected	Purpose	Prompt summary	What AI produced	Accepted / modified / rejected	Commit hash
ChatGPT (OpenAI)	14 Oct 2026	api/cron/notifications.ts Email delivery	Reduce duplicate email delivery risk.	Asked AI how scheduled notification emails could be made safer when retries occur.	Suggested using an idempotency key for each notification and recording delivery success or failure after the provider responds.	**Modified**	`fe72fa655dfe9cdfa177c1151f0fc1702f73207f`
ChatGPT (OpenAI)	14 Oct 2026	Outlook backend integration functions	Evaluate automatic sending of generated Outlook replies.	Asked AI whether generated replies could automatically be sent from the Outlook integration.	AI proposed possible automatic-send approaches, but the team retained draft-based replies so users must confirm before sending.	**Rejected**	`dc81405c7d132d40e265766cec53458f4f535bed`

Section C: Proof attachments

Section D. Verification Statement

I verified the AI-assisted backend code by reviewing the suggested changes and checking that they followed the existing system logic. I focused on the notification processing function, including authorization checks, retrieving pending notifications, handling email delivery, and reporting successful or failed operations. I also checked the function's response structure to ensure that the processing results could be monitored. The changes were reviewed to ensure they did not introduce unnecessary modifications to other parts of the application.

Section E. Understanding Statement

I used AI as an assistant to help me understand and improve the backend process in Sponty CSWI. The AI provided suggestions for handling queued notifications, managing email delivery, and improving error reporting. I reviewed these suggestions against the existing code before deciding which changes were appropriate. I understand that the backend is responsible for processing notifications securely, communicating with the required services, and reporting the results. AI helped me work through possible improvements, but I remained responsible for reviewing the code and ensuring that it met the project's requirements.

Section F. Honesty statement and signature

I declare that the information above is complete and true, and that all AI use in this submission is listed in the log.
